

# Water and Penguins

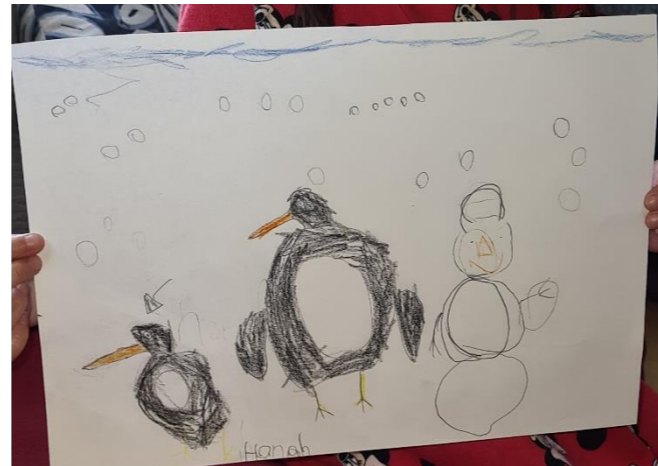

## Sinking and Floating

You had lots of fun becoming investigators and seeing which items sink or float.

You were very happy and excited when your predictions were correct!

You also had great fun making your very own boats and testing to make sure they floated on the water,

You even managed to put passengers on your boat without them sinking!

## Sunflowers

How tall has your sunflower grown? Have you been making sure it gets lots of water and sunlight?

Miss Cameron's sunflower has been eaten by a bug in the garden! I have planted two more sunflower seeds and going to make sure they are safe this time!
