

Falcon class- week 2

This week in Falcon class we have been learning about how light is needed to reflect on surfaces for us to see. We looked at what an incident ray is and the reflected ray. In groups, we then made a periscope to prove that lines travels in straight lines. It was important to angle the mirror to enable this. Have a look at our models below.

Please do have a look at the letters we wrote this week in the perspective of Lady Macbeth- there are loads of photos uploaded to our class gallery on our class page on the school website. We hope you can see the care that we have been putting in to our handwriting and presentation, which will continue to be a focus.
