

Owl Class

Friday 25th September 2020

Dear Parents and Carers,

We have had an excellent week this week. The children continue to settle in well to school life and we are working hard in class! This week, we have learnt about the Vikings, who they are and why they plundered various places in England, such as Lindisfarne. We even learnt that the Vikings founded Dublin! We also carried out a science experiment on thermal insulators and conductors. We found that the best available material we had for keeping ice coolest for the longest was bubble wrap.

Here are some pictures from the experiment:

Thank you for your continued support and your children have been excellent!

Have a lovely weekend,

Mr Charlton and Mrs Searle.
