

Falcon Class

Friday 25th September 2020

This week we have begun looking at our topic of 'Ancient Greece,' by sketching some Ancient Greek pillars in art. We will share some pictures of our artwork with you next week. In Maths, we have been learning about negative numbers and solved calculation across zero. We recognise that negative numbers may be used in the wider world, such as in banking and with reading a thermometer. Please have a look at our acrostic poems and pictures portraying the Holy Trinity, which we drew last Week.
