

Falcon Class

Friday 9th October 2020

In Science, to end our learning on 'light,' we took part in an investigation about how the size of a shadow changes when the object moves further from the light source. In Maths, we have been building on our learning on Number by looking at multiplying 2, 3 and 4 digit numbers by a two-digit number. We showed good collaborative learning to work through a range of calculations. We finished writing our newspaper reports about the murder of King Duncan, in English and worked hard to show the features of report writing.

As promised last week, we are keen to share some of our learning in Art, which has been linked to our topic on Ancient Greece. We have used sketching, learned different shading techniques and looked at repeated patterns. This week, we are linking this learning to DT, where we have designed and created our own amphora pots using clay.
