

## Falcon Class

30<sup>th</sup> April 2021

This week Falcon class delved into learning about the polar expedition led by Ernest Shackleton and his crew of 28 men and 69 dogs. They explored how it might have felt for the crewmembers as they were about to depart and embark on their voyage, not knowing if they would be successful. In Design Technology we made shelters to withstand the harsh polar conditions on the Antarctic and created these in groups using junk modelling.
