

Fox Class

2nd July 2021

This week we have enjoyed combining different curricular areas to create a shadow puppet theatre. We have been learning about light and shadows in science, used art and D/T skills to create the theatres and puppets, and retold the Russian folktale "Firebird" using our puppets. We used torches to illuminate the back of the theatres and create shadows on the screens. In science lessons this week we have investigated the properties of mirrors, and tested different materials to see which reflect light. We even made a rainbow using a cd.
